Tableau Dashboards

- Dashboards in Tableau are a collection of various visualizations, worksheets, and objects brought together to provide a consolidated view of data, allowing users to comprehend information quickly and make data-driven decisions effectively.

Key Elements of Tableau Dashboards

- Visualizations
- Interactivity
- Layout Containers
- Titles, Text, and Annotations
- Dashboard Objects
- Device Layouts

Creating Dashboards in Tableau

To create a dashboard in Tableau:

1. Assemble visualizations onto the dashboard canvas.
2. Add interactivity elements like filters and actions.
3. Format the layout and design for clarity and appeal.
4. Test and optimize for performance and responsiveness.

Benefits of Tableau Dashboards

Enhanced Data Visualization
